The present sequence is a partial human cadherin-10, which is a Ca2+ dependent cell adhesion protein. The human cadherin cDNA was isolated from a foetal brain cDNA library, using probes based on homologous rat cadherin cDNA.

Antibodies or fragments that specifically bind the human cadherin can be used to purify the cadherin, determine its tissue expression and antagonise its ligand/antiligand binding activities.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Example 1; Column 55-58; 569; English.

Combis sequence represents rat cadherin-10. The invention specifically comprovides details of human cadherin-5, -8, -11, -12 and -13, and rat cadherin-8, -5, -11 and -13. Cadherins are calcium-dependent cell cadherin by -5, -11 and -13. Cadherins are calcium-dependent cell cadherin by -5, -11 and -13. Cadherins are calcium-dependent cell cadherin by -5, -11 and -13. Cadherins are calcium-dependent cell cadherin by -5, -11 and -13. Cadherins are calcium-dependent cell cadherin fictity, a hydrophobic membrane spanning region and a C-terminal composition of the cytosteleston conversed among members of the cytosteleston conversed among members of the conversed experimental conserved among members of the converse proteins and other cytoskeleton-associated proteins. The converse converse cadherin say be used in the analysis of the role of cadherins in various cancers. Sequence analysis of the cadherin of converse cadherin proteins may be isolated by using anti-cadherin conversed among members of cadherin conversed among the structure and function of cadherin. The cadherin proteins may be isolated by using anti-cadherin conversed among anti-cadherin conversed among the conversed among anti-cadherin conversed among among anti-cadherin conversed among among anti-cadherin conversed among among anti-cadher
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Matches

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     through eatenins and other cytoskeleton-associated proteins. The novel cadherin proteins may be used in the analysis of the role of cadherins in various cancers. Sequence analysis of the cadherin proteins also allows investigation of the structure and function of cadherin. The cadherin proteins may be isolated by using anti-cadherin antibodies. These antibodies may also be used to modulate the activity of cadherin and to determine the tissue specific distribution of cadherin proteins. Each subclass of cadherins has a unique tissue distribution
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               provides details of human cadherin-5, -8, -11, -12 and -13, and rat cadherin-8, -5, -11 and -13. Cadherins are calcium-dependent cell adhesion proteins. They are glycosylated integral membrane proteins that have an N-terminal extracellular domain that determines binding specificity, a hydrophobic membrane spanning region and a C-terminal cytoplasmic domain, which is highly conserved among members of the superfamily. The C-terminal domain interacts with the cytoskeleton
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     N-PSDB; T85432.

Human and rat cadherin polypeptide(s) - mediate cell-cell adhesion
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             US5646250-A.

The present sequence is full length rat cadherin-10, which is a Ca2+ dependent cell adhesion protein. The rat cadherin cDNA was isolated from a brain cDNA library using a labelled rat cadherin-10 extracellular domain PCR fragment as a probe. The rat cDNA was then used to isolate the cDNA encoding its full length human homologue from a human foetal brain cDNA library.

Antibodies or fragments that specifically bind the human cadherin can be used to purify the cadherin, determine its tissue expression and antagonise its ligand/antiligand binding activities.

The sequence is that of a Streptococcal polypeptide. The polypeptide can potentially be used for the diagnosis prevention of bacterial infections, especially SP infectio It may be used for the treatment of diseases such as othic conjunctivitis, pneumonia, bacteremia, meningitis, sinusit
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          This sequence represents a Staphylococcus aureus protein of unknown function, and is encoded by a DNA sequence of the invention. The DNA sequences were isolated from Staphylococcus aureus WCHU29 (NCIMB 40771). Host cells containing the DNA sequences are used to produce polypeptides or fragments. The proteins are used in the treatment of disease, for inducing an immune response by administering them, to produce antibody and/or T-cell immune response. Antagonists of the proteins are used for the inhibition of bacterial polypeptides. Conditions which may be treated include bacterial infections, especially respiratory, cardiac, gastrointestinal, central nervous, eye, kidney, urinary tract, skin, bones and joints. The proteins can also be used to identify antimicrobial compounds which are broad spectrum antibiotics,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Streptococcus pneumoniae polypeptide. Polypeptide; ORF; open reading frame; infection; k streptococcal; bacteremia; diagnosis; prophylaxis.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 h r s l m A

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        w79335-36 represent Staphylococcus aureus wCHU (NCIMB 40771) proteins that have homology to Bacillus subtilis histidine ammonia-lyase (histidase). The protein is used to generate antibodies and to screen for antimicrobials. The products are used to treat or prevent bacterial infections, particularly where caused by S. aureus but also against Helicobacter pylori. Particular applications are to treat subjects before surgery or insertion of an in-dwelling device (alternatively the device itself is impregnated before placement). The nucleic acid sequence is used as sources of antisense sequences (for therapeutic use) or regulatory elements for controlling expression of bacterial genes, and for antibacterial screening. The protein can be also used as a vaccine.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Staphylococcus aureus histidine ammonia-lyase.

                                                                                                   Expression of the chimaeric gene inhibits infection of plants (pref. sorghum, sugarcane, esp. maize) by MDMV. The transgenic plants display an inheritable resistance trait.
                                                                                                                                                     The sequence of the polyprotein encoded by the polycistronic mRNA (T47073) of maize dwarf mosaic virus strain B (MDMV-B) is given in W10344. New chimaeric genes comprise a monocotyledonous plant promoter linked to a modified nucleic acid sequence derived from the MDMV-B genome. The modification is such that mRNA is translated to a truncated protein (pref. smaller than 200 amino acids), no translation of mRNA occurs or the transcribed mRNA lacks the
                                                                                                                                                                                                                                                N-PSDB; T47073.

Chimaeric gene for imparting viral resistance to plants - contains sequence modified to express non-translatable mRNA, or non-coat

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      The present sequence represents human ATP-binding cassette transport protein (ABCtxH). The ABCtxH proteins are involved in disease-related transport processes, particularly in cancers and neuronal disorders. Antagonists of ABCtxH can be used to prevent or treat cancers or neuronal disorders e.g. Alzheimer's disease, amnesia, amyotrophic, lateral sclerosis, bipolar disorder, catatonia, cerebral neoplasms, dementia, depression, Down's syndrome, tardive dyskinesia, dystonias, epilepsy, Huntington's disease, multiple sclerosis, neurofirbomatosis, parkinson's disease, paranoid psychoses, schizophrenia or Tourette's
                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Staphylococcus
